For customers looking for a few suggestions regarding fabric choices, the above list should help you with your search.

It is entirely up to the customer how much they are prepared to spend on upholstery fabric. We have no affiliation with the suppliers mentioned, this is for guide purposes only to help our customers find good quality upholstery fabrics.

When choosing a fabric, you should pay attention to the **scrub units** or **rubs**. It is how the manufacturers test the durability of the fabric. Anything over 30000 rubs is generally a good wearing fabric suitable for upholstery. I would also recommend if unsure of colour, you get a sample to be sure it's the shade you are after.

Please be aware, since Brexit there is a customs fee on top of your delivery if buying from the UK. Number 6 on the list is a German fabric supplier which more and more of our clients are using. The quality has been of high standard and it carries no customs fee as it is in the EU.

We hope this helps you find a suitable fabric for your project.
